

AEG: Meet Kami Deputy

The *AEG Insider* is proud to announce that we will feature short bios for one of the six *AEG Insider* editors or a leader in the AEG community. Here is an introduction to one of the AEG's leaders — Kami Deputy.

Kami is a rock mechanics and geotechnical engineer with seven years of experience with Kleinfelder Inc. She has a B.S. in geological engineering from Montana Tech and a M.S. in civil engineering from Virginia Tech. Kami has been involved with AEG for approximately seven years, serving on Advocacy Committee and presenting at AEG Annual Meetings. Kami recently relocated to Denver from Seattle, where she has become a co-chair of the Field Trip Committee with the Rocky Mountain Section and co-chair for the communications director. In her spare time, Kami enjoys playing softball, camping, experimenting with homemade wine and reading a good book.
