

Update: AEG Needs Assessment Team

AEG has partnered with The Loyalty Research Center to conduct a needs assessment. The AEG Needs Assessment Team has secured funding from the AEG Foundation and the Geological Society of America's Environmental and Engineering Geology Division to conduct this work. The AEG will share the results of the needs assessment with our members, the AEG Foundation and our sister societies that we affiliate with through the GSA.

AEG and the LRC have commenced telephone interviews with a small group of stakeholders and email interviews with the AEG Board of Directors. Once the results of those interviews are reviewed and summarized, AEG and the LRC will be reaching out to you – our members and supporters – to gain additional information that will launch us into the next phase of the needs assessment. We ask that you please respond to survey queries conducted by the AEG/LRC team, and feel free to contact either of the Needs Assessment Team leaders, [Deb Green](#) or [Duane Kreuger](#).
