

Lac-Mégantic's Human and Environmental Disaster:

The event, the impacts and the lessons to be learned

The Canadian Press/Paul Chiasson

Presented by Senator Prof. R. Galvez, Ph.D., P.Eng.

The Lac-Mégantic train derailment and fire on July 6, 2013 was a human catastrophe and an environmental disaster. A runaway train containing 74 rail cars of light crude oil derailed and caught fire. The explosions and fire killed 47 residents and destroyed over 30 buildings. This was the deadliest rail accident in Canada since 1864. Approximately 6.3 million litres of oil was released into the environment, creating air, water and soil contamination.

This presentation will describe what happened and outline the efforts made to remediate the impacts to this community and the environment.

Presenter:

Senator Professor Rosa Galvez is an expert in environmental impact and risk evaluation, contaminated site restoration and groundwater contaminant transport. She was appointed to the Canadian Senate in December 2016. She is a Professor in the Department of Civil and Water Engineering at Laval University, Quebec.

SCHEDULE

Please contact your local Section for venue and registration details.

DATE 2017	LOCATION	TIME	SECTION CONTACT	EMAIL	PHONE
Sept. 11	HALIFAX	7:00 pm	Haibo Niu	Haibo.Niu@dal.ca	902-893-6714
