### **SP Bibliography Available on the UTMB Website**

Dear ASPE Members,

**Karen Szauter, MD**, has done all of us a great service by providing a link to an extensive standardized patient bibliographical database housed on the UTMB Health website. The bibliography was created to provide a searchable index of more than 1500 papers that have been published since the mid-1960s that pertain to teaching or assessment using standardized patients.

Most helpfully, users can search the bibliography using a range of headings such as author, journal, title, etc. This is a wonderful resource that will contribute to our fund of knowledge.

Much thanks to Karen for doing this.

To access the database, click on the follow URL and then click on Bibliography on the menu to the left.
