

We are Pacific Wellfare Hydrogen Group. We have industrial business parks in the Greater Vancouver Area and China with each park being 50 square kilometers.

In the next two years, we will build 20 hydrogen stations and 5000 hydrogen fuel cell buses and trucks. At the moment, we are partners with China's two largest automobile manufacturers.

We can purchase large amounts of hydrogen fuel cell equipment and hydrogen stations. At the same time, we hope to build long term partnerships with large automobile companies and related hydrogen companies in the industry, in order to dominate the Chinese market and increase our profit margins. We can set up manufacturers in Vancouver and China together to increase suppliers and reduce cost.

In November 2019, we are participating in the biggest Automobile show event in Shanghai. We have a 1000 square foot booth at the automobile section. Once we reach a partnership agreement, we will invite you to attend the event as exhibitors or visitors. In 2018, there was \$7.8 billion worth of agreements between companies signed in the event. We welcome hydrogen station suppliers and hydrogen engine suppliers to connect with us.

At the same time, we are currently recruiting a large number of engineers in Vancouver.
